- **SPEED**
- **AREA RATE**
- **FLOW**
- **APPLICATION RATE**
- **AREA SUB TOTAL**
- **DISTANCE SUB TOTAL**
- **VOLUME SUB TOTAL**
- **AREA TOTAL**
- **DISTANCE TOTAL**
- **VOLUME TOTAL**
- **BACK LIGHT DISPLAY**
- **PERMANENT MEMORY**

The DATAMETER 4 for Spray is just the right size to mount in a cab, as the monitor is only 35mm deep. The front panel has a large dot matrix Liquid Crystal Display with back lighting for easy read out. The sealed control panel has tactile function keys behind an easy to read panel.

The DATAMETER 4 is ideal in a variety of applications when you need to check chemical Application Rates. Set and maintain correct Application Rate when spraying.

The DATAMETER 4 is accurate and easy to use. Operation and Setting of input parameters is done by just two push buttons.

The DATAMETER 4 can be used as a SPRAYMONITOR, or as a AREA - MONITOR.

Dual indication, the dot matrix display will indicate Application Rate as a digital read out as well as a bar graph.

The DATAMETER 4 Kit Includes the electronic monitor, wiring harness and installation hardware. A Flowmeter, magnetic wheel sensor with mounting bracket.

TRANSFERABLE: Can be easily transferred from one implement to another and simply reprogrammed to suit.
